DHA

Purity

Features:

- Healthy essential fatty acid
- 100% Vegan (derived from microalgae)
- Purified liquid concentrate
- Pleasant citrus flavor
- Great for all ages
- Important for nursing and pregnant women
- A few drops deliver a daily dose of essential Omega-3 fatty acids
- No environmental contaminants

Benefits:

- 🌀 Improves your child's intelligence
- 🌀 Aids depression and Attention Deficit Disorder
- 🌀 Improves memory
- 🌀 Important for brain and eye development
- 🌀 Promotes smoother skin; prevents wrinkles
- 🌀 Helps prevent heart disease and arthritis
- 🌀 Lowers risk of Alzheimer's and senior dementia
- 🌀 Lowers "bad" cholesterol

DHA

Purity

Details:

DHA from fish is well established by science to have important health benefits. Fish, however, is an unfavorable source because most fatty fish contain potentially harmful pollutants, such as dioxin and mercury. People also report difficulty digesting these beneficial oils because of the fishy taste and foul odor. The bad taste, indigestion, or burping from these oils doesn't feel healthy.

Why Dr. Fuhrman's DHA Purity? It is a unique natural vegetarian source of concentrated liquid DHA and is produced under strict manufacturing conditions to assure purity and freshness.

Dr. Fuhrman explains:

Moving to a vegetable-derived DHA, rather than a fish derived product, was the first step to address this issue. In our research, we conducted independent laboratory tests on the fish oils in current products to test for stability and rancidity and found them lacking in freshness. The algae oil DHA products scored better, but still did not reach the high standards I desired. To assure optimal health, I wanted to offer a product for my patients, friends, and family that would meet exceptionally high standards for freshness and purity.

After extensive research, we found a solution. We buy the highest quality most concentrated form of DHA, package it in dark glass (not plastic) and then keep the bottles refrigerated to maintain freshness. You can stop holding your nose trying to swallow fishy-tasting oil, you can end the difficulty with burping and that vile aftertaste. You simply can't get a better tasting, fresher DHA anywhere.

Supplement Facts

Serving Size: 0.5 mL
Servings Per Container: 60

	Amount Per Serving	% Daily Value
Calories	5	
Calories from Fat	5	
Total fat	<1 g	<1%*
DHA Docosahexaenoic acid	175 mg	†
