PRODUCT FACTS

SINUS BIOTECT

Common seasonal allergens – primarily pollen from grass, trees or weeds – can be challenging.

SINUS BIOTECT

For a healthy response to seasonal allergens

Common seasonal allergens – primarily pollen from grass, trees or weeds – can be challenging. For many of us, the immune system reacts to these benign substances with sneezing and red, itchy eyes. Although not much research has been done on this topic yet, it is likely that following a healthy lifestyle with a high-nutrient diet could lessen these symptoms. Alongside a high-nutrient diet, certain supplemental phytochemicals may provide additional assistance. Sinus Biotect contains rosmarinic acid, luteolin and other flavonoids to target the arm of immune function that can create an excessive response to seasonal allergens.

PERILLA FRUTESCENS

This supplement is derived from an extract of the *Perilla frutescens*, nature's richest source of rosmarinic acid. *Perilla* seed extract may help to maintain healthy respiratory and immune function, and provide support for those who experience nose or eye irritation associated with common seasonal allergens.¹⁻³

Sinus Biotect is not medicinal and it will not suddenly decrease allergy symptoms. Combined with a healthful diet, this supplement supplies additional phytochemicals to help promote a normal immune system response to allergens.

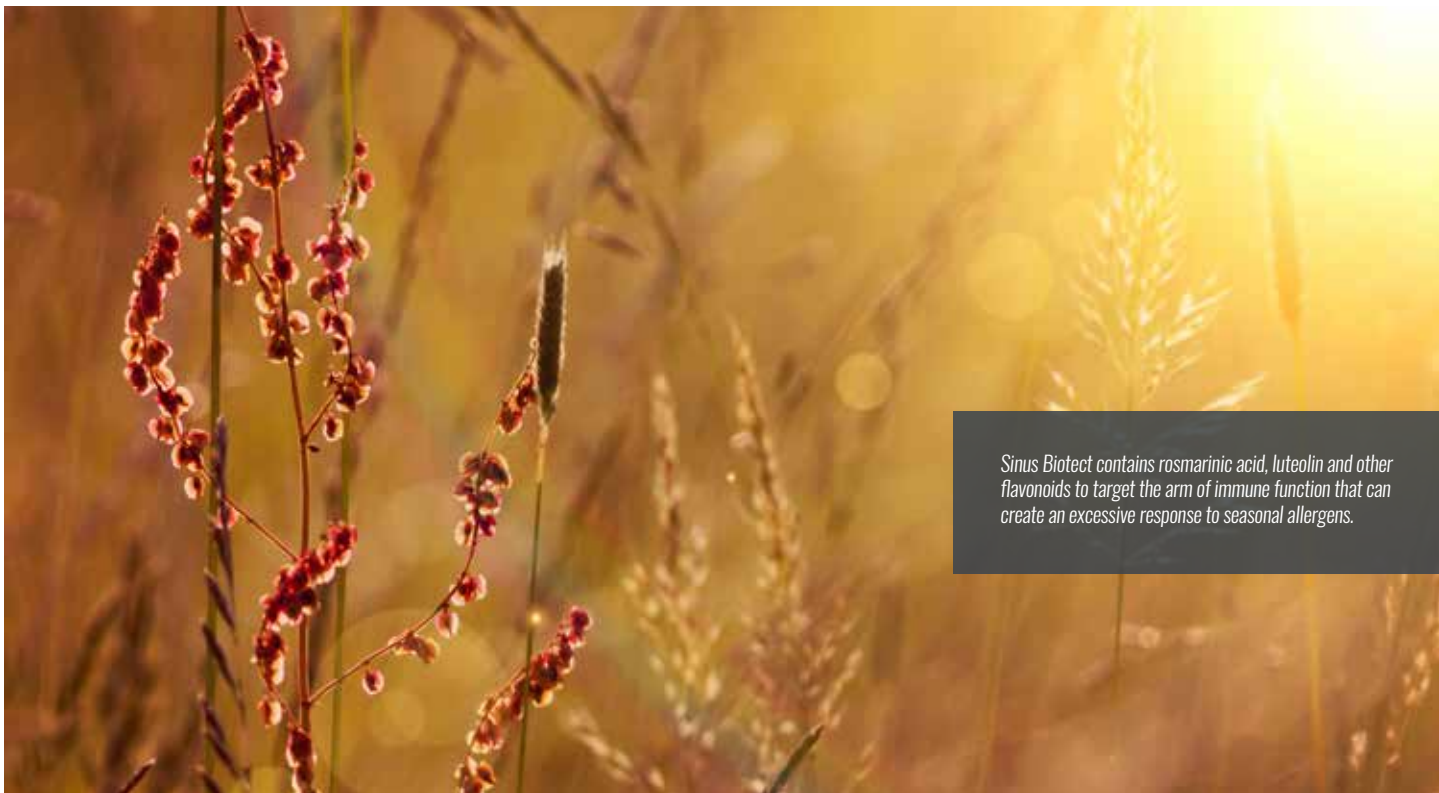

“ALONGSIDE A HIGH-NUTRIENT DIET, CERTAIN SUPPLEMENTAL PHYTOCHEMICALS MAY PROVIDE ADDITIONAL ASSISTANCE.”

SINUS BIOTECT

Product Features

- Vegetarian
- Promotes healthy respiratory function
- Promotes a normal immune response to allergens
- Plant extract containing rosmarinic acid, luteolin and other flavonoids
- Free of gluten, dairy, and soy
- Non-GMO
- Manufactured by a GMP certified and FDA-regulated facility
- Does not contain wheat, soy, dairy products, egg, nuts, tree nuts, fish, crustacean shellfish, colors, artificial sweeteners, and preservatives.

Sinus Biotect contains rosmarinic acid, luteolin and other flavonoids to target the arm of immune function that can create an excessive response to seasonal allergens.

This supplement is derived from an extract of the *Perilla frutescens*, nature's richest source of rosmarinic acid
